Model # Geismar 360

A multi-purpose, all-hydraulic, hirail crane designed specifically for railway needs. This crane operates through 360 degrees of rotation, is on- or off-trackable by its own means, and features a short tail swing, four-wheel drive, and crab steering.

A wide variety of attachments permit the crane to be used in rail gangs, tie gangs, bridge and building work, material yards and ditching applications.
